Projects

Xaus

XAUS provides an intuitive admin panel-based dashboard to manage all crucial aspects of a business, from order creation to user and permission management.

Dream stay

DreamStay, a travel website created with Next.js and integrated with the Supabase (PostgreSQL) database. It offers a streamlined experience for purchasing packages, searching for destinations, and creating personalized trips.

Experience

Full stack developer - Sentry

I work with Java (Spring Boot, Swing), PHP (Laravel), React, and JavaScript. My focus is on continuously improving my technical skills to drive the quality and efficiency of deliveries.

Jul de 2023 - Present
