**Systems Analysis and Development**  
- USF

2022 - 2024

**Santander coders - ADA**

2024 - 2024

**Java bootcamp - DIO**

2024 - 2024

**English - Yazigi(Seven)**

2012 - 2021

## Skills

- Java
- Spring boot
- Spring security
- Rabbitmq
- Kafka
- Postgresql
- Junit
- Avro
- AWS
- React
- Laravel
- PHP

## Projects

### Xaus

O XAUS fornece um painel intuitivo baseado em admin panel para gerenciar todos os aspectos cruciais de um negócio, desde a criação de pedidos até a administração de usuários e permissões.

### E-commerce

An e-commerce platform built with Java Spring Boot microservices uses an event-driven architecture for smooth synchronization. Apache Kafka manages messages, with Confluent Schema Registry ensuring data consistency. Microservices follow the CQRS pattern, using Axon Server to handle commands and queries separately, making the system highly scalable.

## Experience

### Full stack developer - Sentry

I work with Java (Spring Boot, Swing), PHP (Laravel), React, and JavaScript. My focus is on continuously improving my technical skills to drive the quality and efficiency of deliveries.

Jul de 2023 - Present
